

EXCHANGE AND REPAIR PROGRAMS

OEM warrantied pump without the wait

Total Maintenance Solutions (TMS) offers a pump exchange program that provides a 100% remanufactured name brand pumps without the wait and keeps your organization operating on schedule and within budget.

TMS exchange pumps help to avoid costly production or process downtime when pump repair is required or imminent. If the size and type of pump you require is in stock, TMS will either bring you a pump or "same day ship" it to you if your PO# is received by 2pm CST.

By using the TMS Exchange Program your broken pump is exchanged for the remanufactured pump, and you pay only for the repairs needed to bring your old pump back to OEM specs. You save on-site labor, and shipping costs, where applicable.

Track repairs every step of the way

TMS repairs nearly all forms of rotating equipment, and can remanufacture your pumps with a 12 to 18 month OEM warranty guarantee. TMS provides you detailed photos at a secure Dropbox page where you can review your pump's repair requirements, visually. Ask your service tech for a demonstration of TMS' online pump repair gallery, and samples of real time pump tracking documentation.

THE TMS DIFFERENCE

We warrant that all brand exchange pumps are free from defects in materials and workmanship at the time of shipment, meet or exceed the Original Equipment Manufacturers (OEM) specifications and we back all purchases up with our one year warranty.

Below is a list of brands of exchange pumps TMS has in stock.

- Busch
- Beech Russ
- Busch Panda
- MD Blowers
- Rietschle
- Leybold
- Kinney
